LOBEDU PROPERTY, MARRIAGE AND FAMILY

(h) The incidence of cross-cousin marriage and its variations in two generations of descendants of A (counting only the actual members of his lineage as shown in Figure 9) over a time-span of over sixty years (i.e., from about 1895 to 1962) was 31 per cent (nine out of twenty-nine marriages).

The arrangements in the above lineage segment are by no means unusual. This lineage is that of a district head, but it is representative of numbers of cases that could be chosen from among non-Christian traditionalists who still form the majority of the tribe.
